Experience the Convenience of CropMix™ DDP®

- Custom blend of boron, zinc, copper, iron and manganese
- Scientifically designed for better plant availability and earlier nutrient uptake
- Formulated to safely and effectively deliver nutrients to crops throughout the growing season

More Feeding Sites

With patented EvenCoat™ Technology, Wolf Trax CropMix DDP can be easily coated onto every granule of a fertilizer blend. This results in blanket-like distribution of the nutrient combination across a field, placing the nutrients closer to plant roots for earlier plant uptake.

WOLF TRAX DDP COATED ON EVERY GRANULE

TYPICAL GRANULAR MICRONUTRIENT

Earlier Uptake

Wolf Trax CropMix DDP features the *PlantActiv*[™] Formulation, which optimizes particle size for earlier plant uptake. The nutrients are also formulated to resist soil tie-up and remain plant-available.
